

[Report Writing/](#) [Referencing/](#) SHU Maths report template

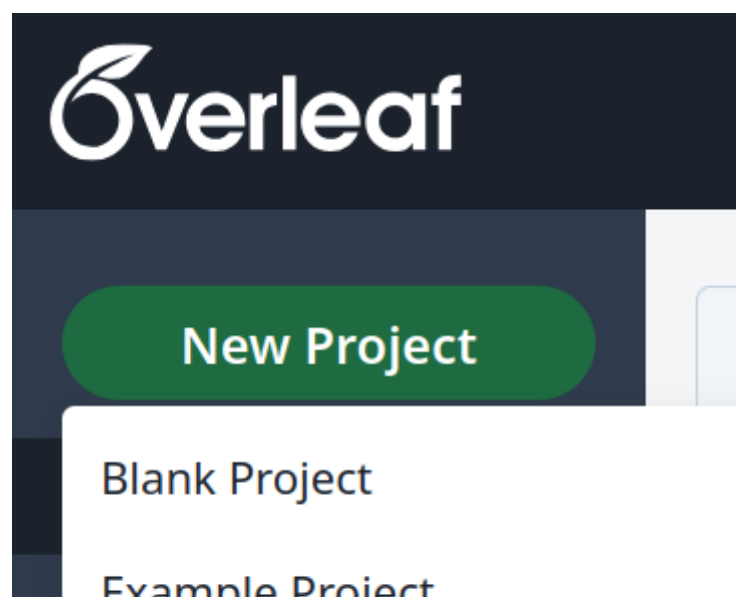

SHU Maths report template

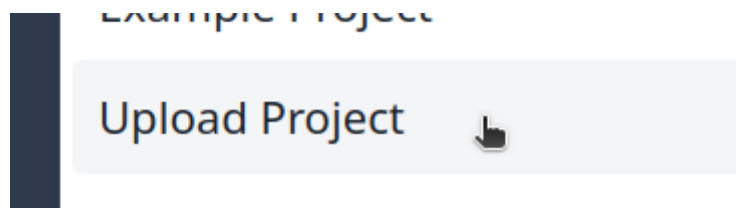

At various times during your degree (including in this module), you will be asked to produce a report. The purpose of this document is to set out a 'SHU Maths' report format that you should use unless the assessment you are completing asks for something different.

The template document includes report requirements, advice on how to work this in LaTeX, and advice on professional writing.

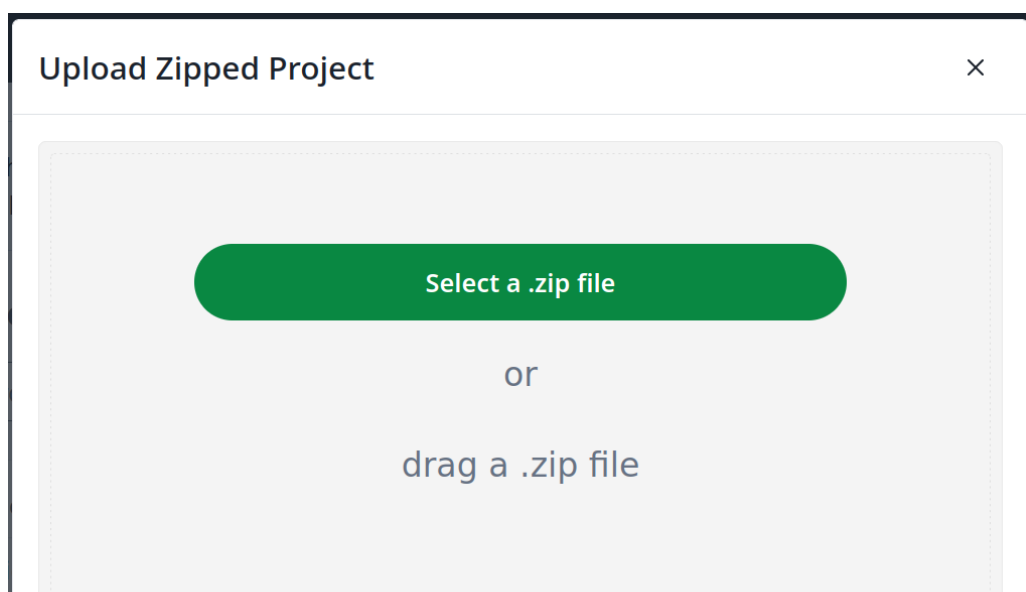

The template is included here as a zip file which is suitable for loading into Overleaf. You should have an Overleaf account from the work we did on LaTeX in the first semester.

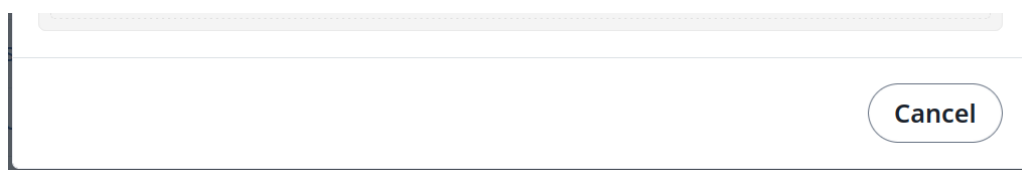

1. Go to overleaf.com and log in.
2. Under 'New Project', you should find 'Upload Project'.

3. Download [the SHU Maths report template](#).
4. Select or drag the zip file you just downloaded to upload it to Overleaf.

This should open the template and you are ready to edit it into your report.
